PROFESSIONAL EXPERIENCE

Interad Corp. - Front End Developer; Toronto, ON

July 2022- Present

- Design the webpages as per client requirements using Figma.
- Develop webpages for clients using React or WordPress, depending upon project requirements and complexity.
- Implement Google Analytics on web pages, collect, prepare, and submit analysis reports.
- Follow the WCAG guidelines to ensure the accessibility standards are met.
- Develop and integrate campaign pages for RBC website; optimize the performance of existing RBC web pages. Reduced the page load time by 10%.

Equifax -Junior QA Engineer, Contract; North York, ON

Oct 2021 - July 2022

- Understood specifications and requirements based on technical/client needs; created and maintained test documentation(s).
- Developed DAG, YML config and input files, uploaded them to GCP bucket and ran the tests via Airflow.
- Used Postman to test the given API for security and response accuracy by providing the required parameters.
- Wrote scripts to automate tasks to help save time for other important issues. Saved 20% of the time otherwise spent on those tasks.
- Kept track of the bugs by using management tools: Jira and its sub-component Zephyr.

Eva Solutions Pvt. Ltd - Fullstack Developer; Patiala, India

July 2015 - June 2019

- Prepared design and requirement document as per the client requirements.
- Developed responsive websites using ReactJs, WordPress, or simply HTML and CSS, keeping in mind the requirements of the product.
- Created REST APIs using ExpressJS and NodeJS from scratch to fetch and serve data to be displayed on the UI.
- Designed and built database, SQL, or NoSQL, depending upon the type of data to be stored and relations to be built.
- Wrote type safe, immutable code with Typescript.
